Beginning in September 1948 the school committee voted to eliminate the sub-primary grade. It was fortunate that this action was taken as the schools would have been over-crowded and instruction would have suffered. It will be necessary to continue this practice until such time as better school facilities are provided. The entrance age for grade one is six years on or before December 31, following the opening of school in September.

Bus transportation is furnished at both ends of the town. The vehicles are new and results are very satisfactory. I would recommend that routes be extended to accommodate all pupils, in order to eliminate the payment of elementary tuition in the south end of the town.

Considerable work was done on the building during last summer. General repairs and extensive painting placed the building in more acceptable condition. Renovations to comply with fire laws were made, and fire extinguishers were placed in each building. However, the inadequacies typical of most one room rural schools, still remain.

We have been able to retain a number of teachers of experience and have been able to fill vacancies as they occurred. It is becoming increasingly hard to find

well qualified teachers for rural schools. Our staff has accomplished good work considering the handicaps.

It is obvious to all people that a consolidated school is needed to provide proper modern educational facilities for the children of the town. As a preliminary step, a group of citizens has filed a bill with the Legislature to provide for a school district in North Kennebunkport. The purpose of the bill is to allow the town to go beyond its 5% debt limit in order to raise money for the building program. This bill, if approved by the Legislature, must be submitted to the town for approval.

The needs of the town will be met by the building of a six room school, together with certain auxiliary rooms. It is estimated that such a building would cost about \$75,000. Certain state funds may be available to towns, and the law provides for extension of the finance period to thirty years. Doubtless further details will be presented to the town at a later time.

As teachers have been furnished with adequate books and supplies, the general picture, as to instruction, has been as good as the average for rural schools.

There has been an increase in the number of pupils during the year. All forecasts seem to point to continued increase in the birth rate and therefore increased enrollments. The present buildings are serving to capacity. Some action on the matter of providing accommodations for the increased enrollments will be necessary within a short period of time.

I wish to express my appreciation to the committee, school personnel and citizens for their interest and cooperation.

Respectfully submitted,

PAUL LARRABEE
Superintendent

ANNUAL REPORT OF PUBLIC HEALTH NURSE

1948 NORTH KENNEBUNKPORT

Health is the greatest of all possessions. You can be wise about using your public health nursing service which can help you to be healthy.

How can you help your public health nurse help your community?

- (1) By seeking her aid in your own family's health problems.
- (2) By telling your neighbors about public health nursing services that may be had for a modest fee, or at no cost if the patient is unable to pay.
- (3) By giving volunteer service such as working on committees and helping in clinics.

Since the Public Health Nursing service began on May 1, 1947, many citizens have become aware that the public health nursing service can help them meet many of their problems during illness and can teach them to apply the rules of health that frequently prevent sickness.

The work has become increasingly interesting and many phases of the program have expanded during the past year.

A great deal of interest has been stimulated in dental health and a dental health education and service program has been started in the schools. This includes lessons on mouth health, mouth examinations, and individual instruction periods. Sodium fluoride treatments were offered to all second grade children. These treatments require four applications of a 2 solution of sodium fluoride and they reduce the incidence of decay by about 40 on a group basis.

Physical examinations were given to school children in selected grades. I would like to extend an invitation to each parent to accompany their child when this examination is given.

The yearly smallpox vaccination clinic was held in the spring. Diphtheria and whooping cough immunization was also offered to all children below twelve years of age.

Child Health Conferences have been held once a month at which babies and children of preschool age not under the care of a private physician may receive health supervision. The function of the child health conference is to keep the well child well and to promote his best possible state of health.

I will include a few statistics for 1947 and 1948 so that you may compare them and note the increase in different phases of the service.

Immunizations

	1947	1948
Smallpox	17	61
Diphtheria	9	53
Whooping Cough	2	40
Tetanus	4	3
Antepartum cases admitted	16	12
Number of visits	29	17
Postpartum cases admitted	4	9
Number of visits	4	12
Infants admitted	14	26
Number of visits	35	65
Preschool children		
admitted	6	39
Number of visits	8	119

Child Health Conference		
Attendance	40	125
Infants examined	6	36
Preschools examined	8	43
Number of visits to schools	26	41
Teacher—Nurse Conferences	28	52
Children examined by school physician	0	106
Follow-up visits	25	47
Audiometer tests	0	73
Norbidity or bedside nursing visits	27	39
Office visits	1	81

You will note that 106 children were examined by the school physician. Sixty of these children were examined in the early part of 1948 and really should be credited to 1947, although this phase of the program was not launched until 1948.

I would like to take this opportunity to thank all who have cooperated so well in making this program a success. With your support and interest I hope to continue to give you nursing services during 1949. I am especially grateful to the Teaching Staff, Superintendent of Schools, and to the Health Council for their active support of the program and hope they will continue to help make this a healthier community in which to live.

Respectfully submitted,

FLORENCE G. POIRIER
